Software Developer with experience in mobile and web development. Skilled in building Mobile applications and responsive websites using technologies such as Java, Kotlin, JavaScript, React.js. Completed freelance projects and published applications on mobile platforms, gaining practical experience in design, development, testing, and deployment. Gained IT experience during national military service as an IT Administrator, working with system support and basic networking tasks. Also familiar with Linux, Python, and cybersecurity tools such as Kali Linux. Eager to grow and continue improving technical and problem-solving skills.
